Education

Texas Tech University

Aug 2022 - May 2026

Bachelor of Science, Computer Science (GPA: 3.602)

- **Achievements:** Deans list award 5X, Texas tech presidential merit scholarship

Work Experience

Zata Corp | Software engineering Intern

Jun 2024 - Aug 2024

- Independently identified and resolved 3 critical backend issues in Java and Python applications by utilizing Postman for API testing and PyCharm's debugger for tracing logic errors
- Led one independent code review using GitHub pull requests and SonarQube for code quality checks, helping reduce post-release bugs
- Developed the API integration for Apple Watch data as my final project, using PostgreSQL for data storage, OAuth2 for secure authentication, and Swagger for API documentation
- Collaborated with senior engineers to debug backend issues, using Wireshark for network analysis and the ELK Stack for log monitoring, cutting average debugging time by 2% and improving system stability

Texas Tech University | Community Advisor

Aug 2024 - Present

- Mentored and supported 50+ diverse residents, resulting in a 7% increase in student satisfaction and a 5% decrease in reported incidents.
- Resolved 4 conflicts and enforced university policies, resulting in a 2% reduction in policy violations and maintaining a 100% safety record.
- Conducted 3 policy education sessions for 50 residents, resulting in a 17% decrease in policy violations and promoting responsible behavior.

Projects

Real time chat application

Mar 2023 - Aug 2023

- Developed a real-time chat application utilizing React.js for the frontend, providing a dynamic and responsive user interface.
- Implemented user authentication through Firebase Authentication, enabling secure login and logout via Google accounts.
- Designed and managed chat room functionalities, allowing users to create, join, and leave rooms, facilitating organized and topic-specific discussions.
- Established real-time messaging capabilities using Firebase Realtime Database, ensuring instantaneous message delivery and synchronization across clients.
- Maintained message history for each chat room, allowing users to access previous conversations upon rejoining, enhancing user engagement and continuity.
- Deployed the application on Vercel, ensuring seamless integration and continuous deployment for rapid updates and scalability.
- Debugged complex issues in real-time communication flows using Firebase's logging capabilities and React Developer Tools, ensuring 100% reliability in the chat system.

Dynamic Event Scheduler

May 2024 - Sep 2024

- Developed a RESTful API-based event scheduling application using Spring Boot 3.0, enabling seamless integration for creating, updating, deleting, and retrieving events
- Implemented secure user authentication and authorization with JSON Web Tokens (JWT), ensuring that only authorized users can access and manage their events.
- Utilized MySQL for persistent storage of user and event data, designing scalable database schemas to handle a large volume of events and users efficiently.
- Integrated Swagger UI for comprehensive API documentation and testing, facilitating easy exploration and interaction with the API endpoints.
- Designed endpoints to retrieve events based on specific time frames (Day, Week, Month), enhancing user experience by providing flexible scheduling views.
- Deployed the application on a local server environment, configuring application properties for optimal performance and security.
- Employed Logback as the logging framework within Spring Boot, facilitating efficient tracking of application events and aiding in troubleshooting and performance monitoring.

Skills

- **Programming Languages:** Python, Java, C++, SQL, C#, JavaScript, C
- **Frameworks & Libraries:** Node.js, React.js, jQuery, MongoDB, Spring Boot, Express.js, Socket.io
- **Tools & Technologies:** Linux, Git, Object-Oriented Programming, AWS, Firebase Real time Database, MySQL, Docker, Object Oriented Programming, Swagger Ui, Vercel
- **API Integration & Development:** Rest APIs, Unit Testing, Debugging, Version Control, WebSocket APIs, Swagger, Postman
- **Databases & Data Management:** MongoDB, PostgreSQL, MySQL
