EDUCATION

Texas Tech University , Lubbock, Texas

Bachelor of Science in Electrical & Computer Engineering, Minor in Mathematics

January 2027

GPA: 4.0

SKILLS

Programming: Python, Java, JavaScript, Typescript, C, C++, Assembly, HTML, CSS, React.js, MySQL, Linux, PostgreSQL, Git, GitHub, React, Node.js, Android development, Solana

Relevant Coursework: Micro-controllers with Assembly, Calculus-based Physics I and II, Introduction to Computing (Python), Object Oriented Programming (Java), Linear Algebra, C programming with hardware applications, Modern Digital Systems Design-Awards, Data Structures and Algorithms.

Professional Organizations: National Society of Black Engineers, Institute of Electrical and Electronic Engineers, Color stack, CodePath.

WORK EXPERIENCE

PWC Remote Extern - Extern

September 2024 - October 2024

- Performed systematic analysis of program data across disability support organizations, implementing structured evaluation methodology
- Architected comprehensive technical documentation system for service workflows and functional requirements
- Executed research analysis of training programs, translating complex requirements into actionable technical specifications

Student Mentor - ConocoPhillips Engineering Enrichment Center, Lubbock Texas

August 2024 - Present

- Mentored first-year engineering students at Texas Tech, providing academic guidance and professional development support.
- Contributed to fostering a supportive engineering community within the college.

Software Engineering intern - Arravo , Lagos, Nigeria

June 2024 - August 2024

- Developed a web application named "Skilled Man" with a team of interns.
- Created and styled web pages using HTML, CSS, and Java, Utilized React.js to build interactive and dynamic user interfaces, implemented responsive design principles to ensure the web app is accessible on various devices and screen sizes
- Designed and implemented a user sign-up page that efficiently collects and stores user data.
- Utilized Git for version control, regularly pushing updates to a shared project branch.

PROFESSIONAL CERTIFICATIONS

Meta Backend Developer Professional Certificate

In Progress Expected December 2024

- Developing skills in backend development, including server-side programming, database management, and API integration.

Amazon Web Services Cloud Practitioner

In Progress, Expected December 2024

- Learning Proficiency in cloud concepts, AWS services, security, architecture, pricing, and support, enabling effective implementation and management of AWS-based solutions.

AT&T Technology Academy

April 2024

- Acquired practical development training and personal self-development skills.
- Gained technical acumen, including network troubleshooting, 5G tech strategy, and Cloud computing fundamentals.
- Gained insights and advice on business, leadership, and career from business executives and recognized experts.

PROJECTS

Traffic Light Control System (Arduino and Embedded C)

March 2024

- Engineered an automated traffic light control system using Arduino and embedded C programming to manage intersection signaling effectively.
- Designed and executed a state-machine logic to alternate light sequences, improving traffic flow efficiency.
- Programmed and utilized digital I/O pins for LED control logic, implementing a time-based state transition for traffic lights without the need for external sensors.

Light-Tracking Sensor System (C/Arduino)

November 2023

- Engineered and programmed an Arduino-based system to autonomously follow light sources using photoresistors as sensors.
- Integrated light sensors with servo motors, utilizing C programming to process sensor input and dynamically adjust motor angles.
- Applied principles of electronics and embedded systems to design real-time tracking responses to varying light intensities.
- Demonstrated proficiency in hardware-software interfacing, leading to a practical understanding of control systems and automation.
